

Full Stack Engineer (m/f/d)

Hamburg

Founded in 1921, OLDENDORFF CARRIERS combines its history as a German shipowner with the network of one of the world's leading drybulk operators. We currently control some 750 chartered and owned vessels of 67 mio tdw, and we carry around 330 mio tons of raw materials and semi-finished products across the seven seas each year. Our customers can expect 100% performance. All the way.

For our Software Engineering Team, we are looking for an experienced Full Stack Engineer to join us in our Hamburg office. You will take ownership of complex software projects from conception to delivery independently driving technical decisions while actively shaping the way our team works and communicates. If you thrive in a high-responsibility environment and are looking for a long-term home where your impact is visible across the entire organization, you might be a great fit.

You are joining a fast-paced team of open-minded professionals, developing, and delivering diverse software and applications across all kinds of business areas within Oldendorff. Software Engineering is changing fast and we are leaning into it. We actively explore and adopt AI-assisted

development, automated workflows, and emerging tooling to stay ahead. At the same time, we know that deep engineering skills remain critical.

Job Responsibilities

- Independently lead and drive end-to-end development of modern, robust, and scalable web applications from requirements to production.
- Take ownership of architectural decisions and proactively identify technical improvements, risks, and opportunities.
- Drive the communication between our IT Operations, Data Engineering, Analytics, and Product Management teams translating technical complexity into clear, actionable specifications.
- Mentor and support junior team members and actively contribute to improving team processes and engineering standards.
- Participate in the agile software development lifecycle, from specification and design over development and delivery to maintenance.

What You Bring Along

- Strong proficiency in TypeScript, Node.js, and SQL; hands-on experience with NestJS (backend) and Angular (frontend) is a strong plus.
- Solid understanding of API architectural styles (REST, GraphQL), communication protocols, and encoding.
- DevOps: Experience with Docker, Kubernetes, ArgoCD, Helm, Dynatrace, and CI/CD pipelines as part of modern DevOps workflows would be beneficial.
- AI Tooling: Familiarity with modern AI concepts and tools including AI Agents, Skills, and MCP (Model Context Protocol) and a practical mindset for integrating them into development workflows to boost productivity and product quality.
- Automated Testing: Experience with automated testing strategies across the stack unit tests (Jest, Vitest), end-to-end tests (Playwright, Cypress), and integration tests with an understanding of when and how to apply each effectively.
- A collaborative mindset: you give and receive feedback constructively and actively contribute to a healthy team culture.
- Strong English communication skills, both written and spoken.

What We Offer

- Our corporate culture is special: relaxed and international, open and traditionally with flat hierarchies.
- Since the very beginning, teamwork and quick decision making have been our success factors. Encouraging our employees to realize their ideas and initiatives is as important to us.
